Quality Assurance with hands-on experience in designing and executing manual test cases, performing end-to-end, regression, exploratory, sanity, and user acceptance testing across multiple business domains. Proficient in manual testing and automation testing using Playwright. Passionate about delivering reliable software through structured testing and cross-functional collaboration

EXPERIENCE

Qiscus - Quality Assurance Intern | March 2026 - Present

- Contributed in team as Quality Assurance across 6 client projects spanning healthcare, event, and internal system, and supported testing activities for 3+ clients projects.
- Designed and executed manual test cases covering functional, exploratory, sanity, regression, performance, led user acceptance testing (UAT), and ticketing bug through Notion.
- Collaborated with PM and Developers to validate requirements, reproduce issues, verify bug fixes, and improve overall product quality.
- Executed automation testing using Playwright for WhatsApp workflows to improve regression testing efficiency, and automated load testing using Apache JMeter and k6.
- Contributed as part of AI Trainer team for 2 client projects by refining product knowledge base and improving interaction rules to enhance response accuracy of LLM chatbot.

Universitas Pakuan – Mobile Programming Laboratory Assistant | March 2026

- Assisted in mobile programming using Flutter practicum courses for two vocational classes through video sessions.
- Improved the course modules prepared by the lecturer.

Monfori Nusantara – Mobile Developer Intern | August 2024 - September 2024

- Developed an internal mobile application using Flutter to streamline laboratory documentation and daily operational workflows.
- Collaborated with laboratory manager to gather requirements and deliver solutions aligned with business needs.
- Performed white-box testing and performance testing to ensure application compatibility on lab employee smartphones.
- Prepared project documentation and facilitated User Acceptance Testing (UAT) with the laboratory manager before deployment.

Universitas Pakuan Student Community Service – Web Developer | April 2024 - July 2024

- Led a small development team in building a village information website for Tegal Village, Bogor.
- Collaborated with village officials to gather requirements and define content and functional needs.
- Developed the application's user interface, core features, and database schema using Vanilla JavaScript and Node.js.

EDUCATION

Universitas Pakuan | Bachelor of Computer Science (2021 - 2025)

- **GPA:** 3.89 (Cum Laude).
